Professional Pipe Beveller for on-site welding applications

The cutting head of the beveller has 3 cutting tips, each of them having 4 cutting edges to rotate once becoming blunt, so it is economical to use. The cutting heads are available in most commonly used bevel angles (30°, 37.5° and 45°). There is also a stopper feature, that enables the operator to make similar additional bevels to the same pipe O/D.
